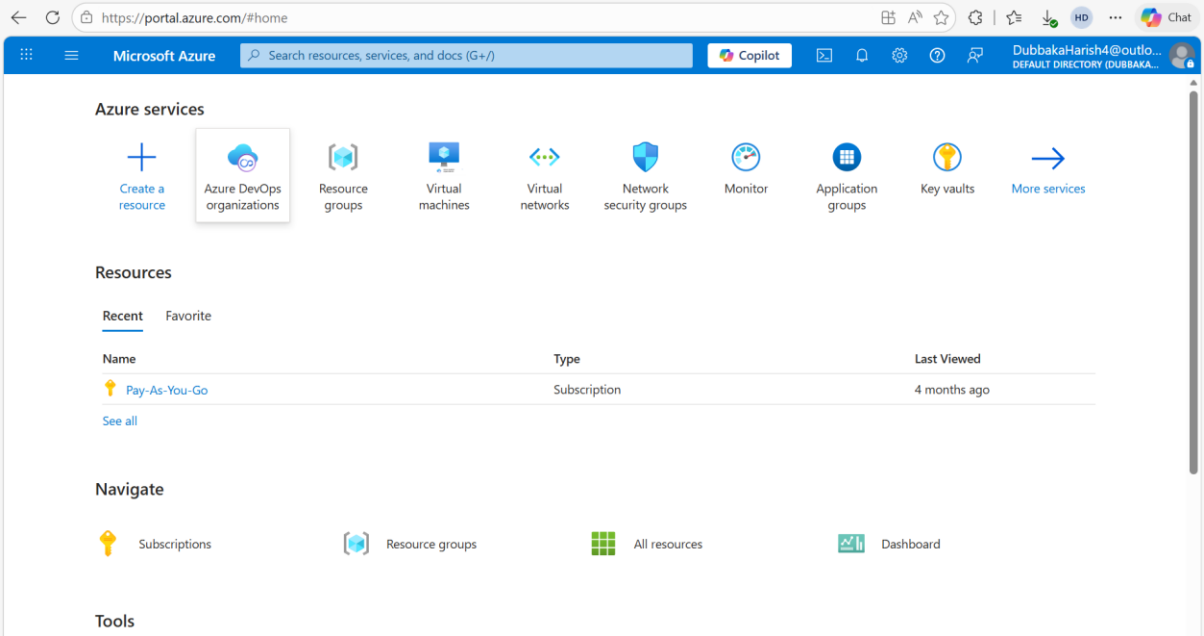
Login to the azure portal using the below link with your credentials

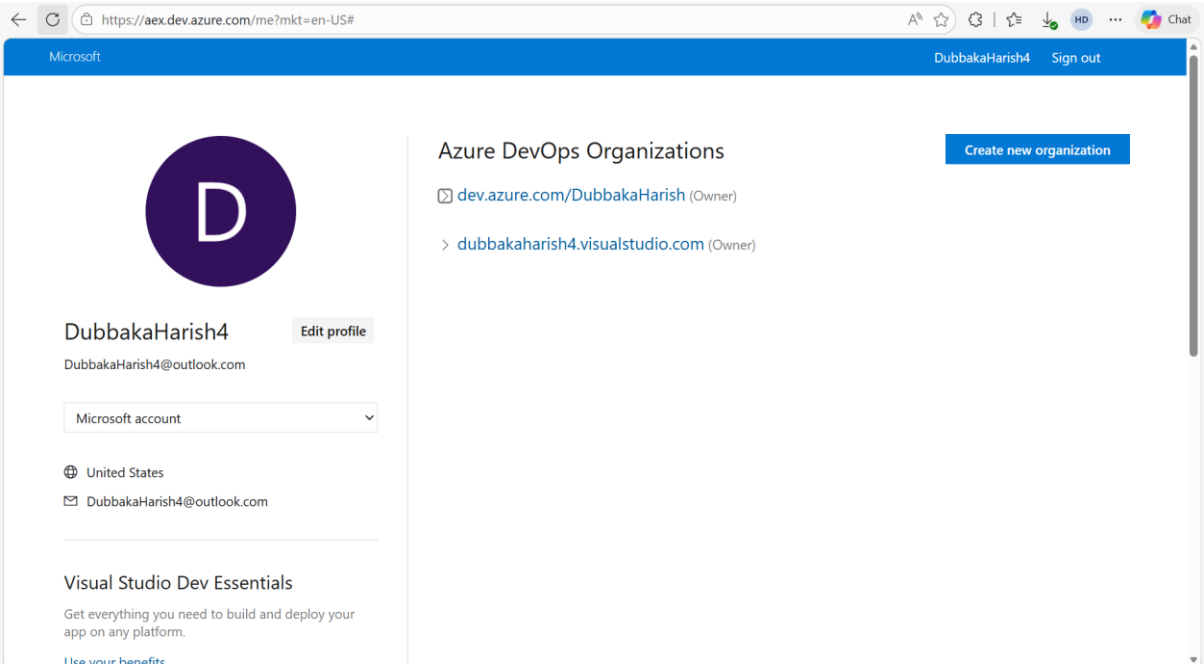
https://portal.azure.com/



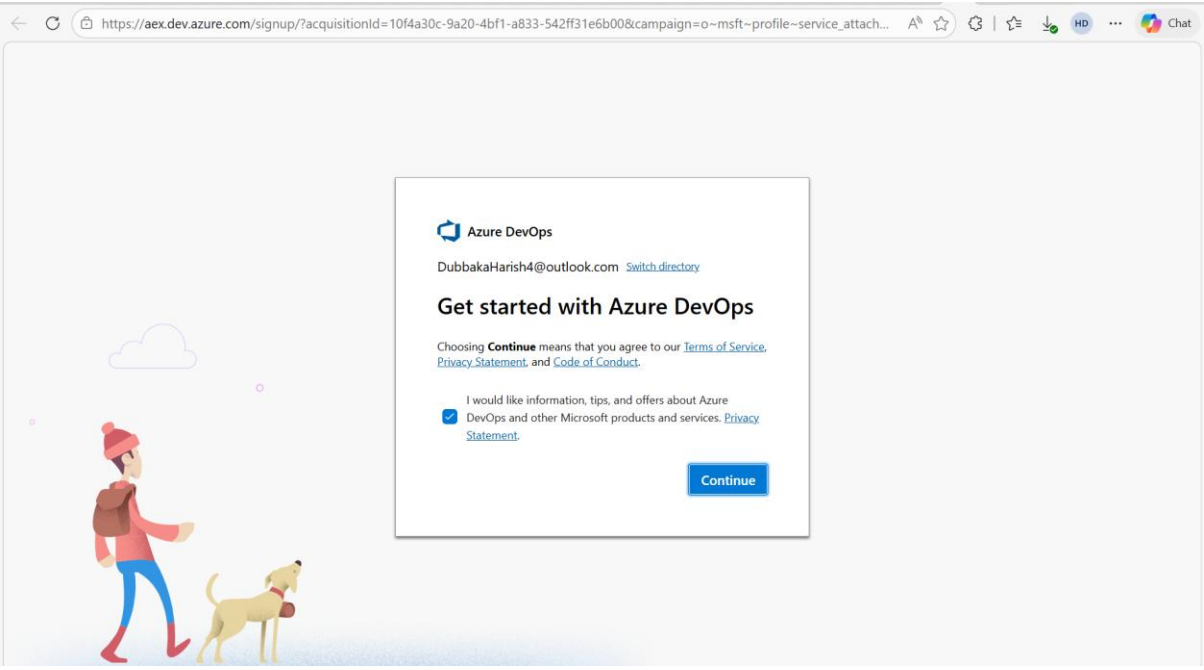
Navigate and click on the azuredevops organization

Which opens in another browser **https://aex.dev.azure.com/me?mkt=en-US#**

Click on create new organization

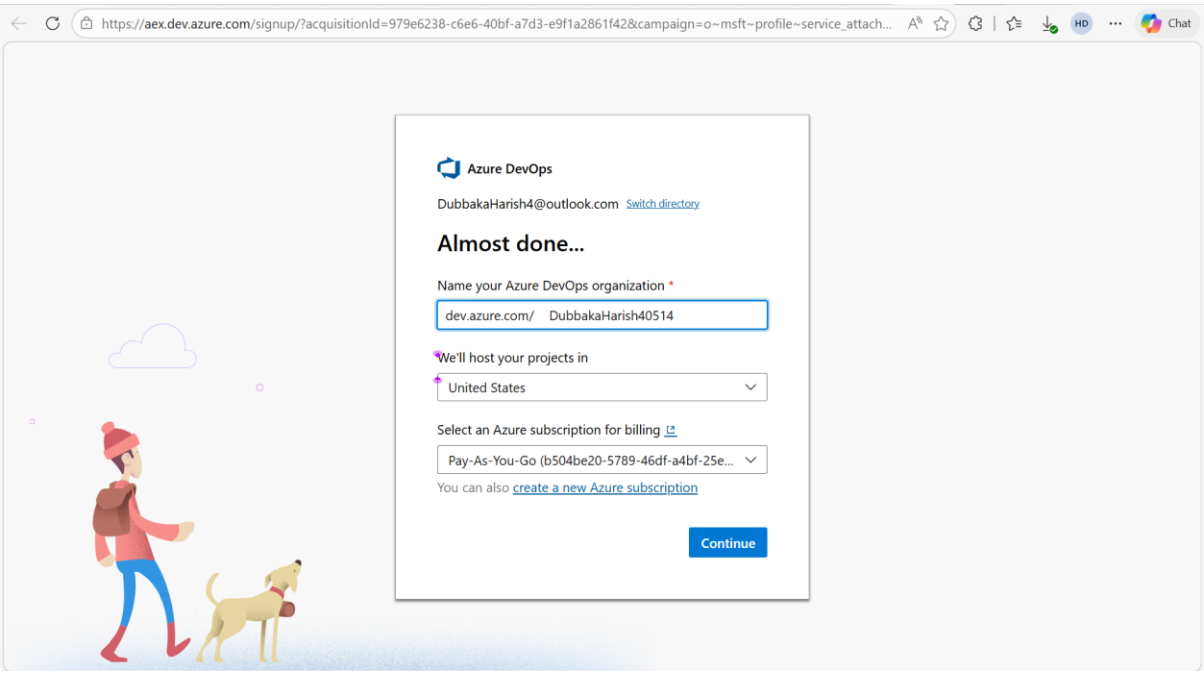


Continue

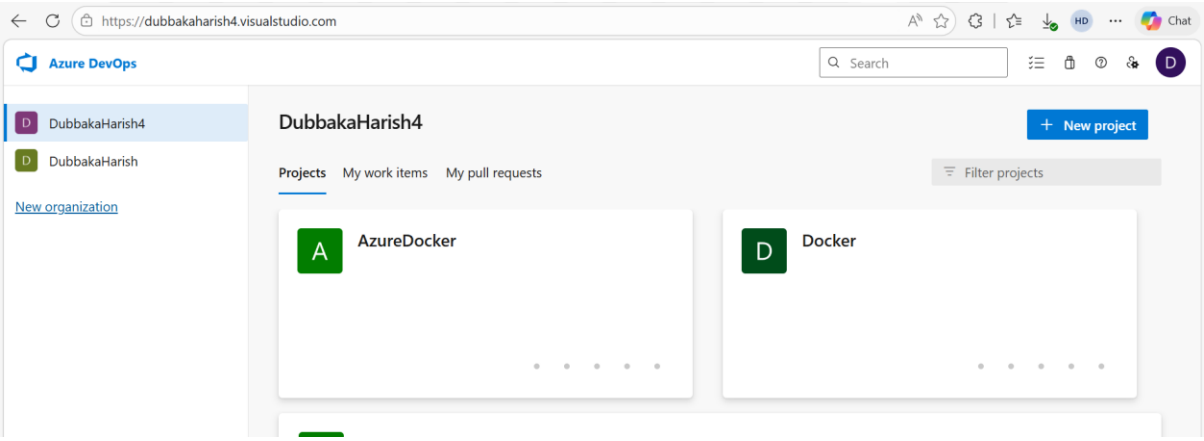


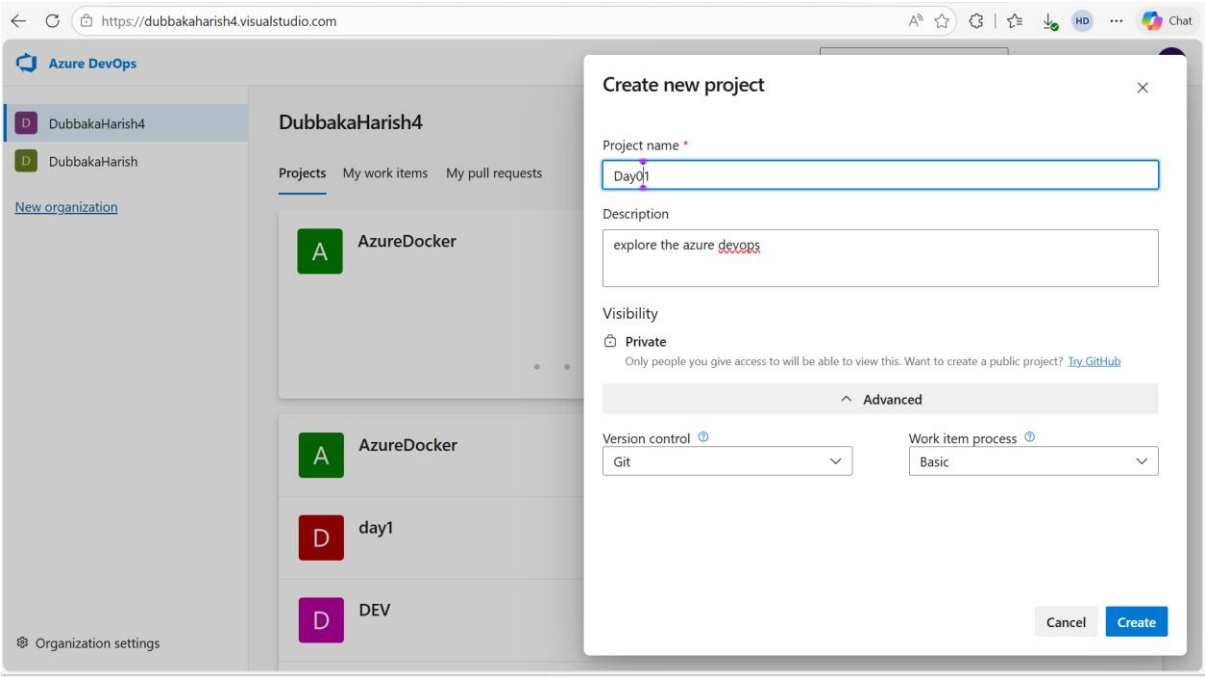
Name the organization

And choose the nearest location

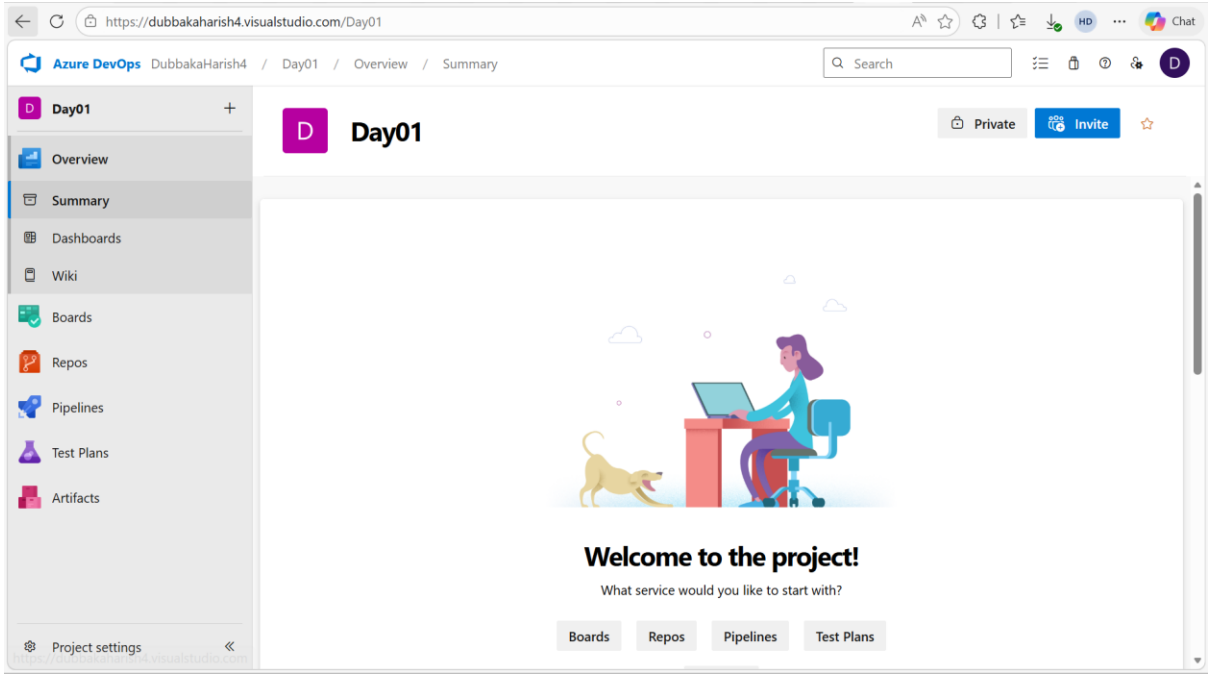


Create the new project





We can change he work item process later as well



Let’s explore each service in the details further
